What Do You Get?

How Much Is It?

Why Use Digital Dictation Solutions

Streamlines documentation, saving clinicians' time.

Reduces risk of documentation errors.

Improves workflow efficiency in high-paced settings.

Supports regulatory compliance and accurate record-keeping.

How Our RAG-Based Approach Fills Gaps

Contextual retrieval enhances relevance of information.

Adaptive responses tailored to specific patient cases.

Instant access to guidelines and past records in real-time.

Seamlessly integrates with EHRs, boosting clinical insights.

Comparison with Existing Solutions

Nuance: Accurate transcription, but limited contextual retrieval.

Suki: Good for task automation, lacks deep info retrieval.

Philips: Basic transcription, no adaptive AI or context-based response.

C.A.L.I.X.: RAG-powered, enabling real-time, context-specific guidance.

C.A.L.I.X.'s Unique Selling Points

ChatGPT with RAG for accurate, relevant information on demand.

Personalized responses that improve over time.

Direct EHR integration for streamlined clinician support.

Saves time while enhancing documentation accuracy and insights.
