Ghanatk

Traditional Brokerage Firms manually handle every step from sourcing to closing. Cost grows linearly with volume.

This is not a listing problem.
This is a closing problem.

1 Time to Response
Buyers submit inquiries and wait hours for responses.

2 Inventory Matching
Brokers push inventory based on commission, not buyer fit.

3 Deal Tracking
No system to track deals from inquiry, viewing, negotiation, to closing

4 Communication Chaos
Calls, WhatsApp, Sheets, and calendars are disconnected.

5 Broker Capacity
Brokerages cannot scale beyond hiring more brokers.

6 Marketing & discovery
Listing portals solved discovery, No one solved closing.

Not Solved and As A Result:

~50–70% of buyer inquiries never convert because brokers respond too slowly

Brokerages lose 20–40% of potential revenue due to missed follow-ups, poor matching, and delayed closings.

Hiring additional brokers to handle more leads increases overhead 50–100% per broker, making growth expensive.

A single broker can only manage 10–15 active leads simultaneously, limiting revenue.

Ghanatk

The AI brokerage that closes deals 10X faster by removing brokers from the pipeline

Brokers only negotiate and close. Everything before that is automated.

Our goal

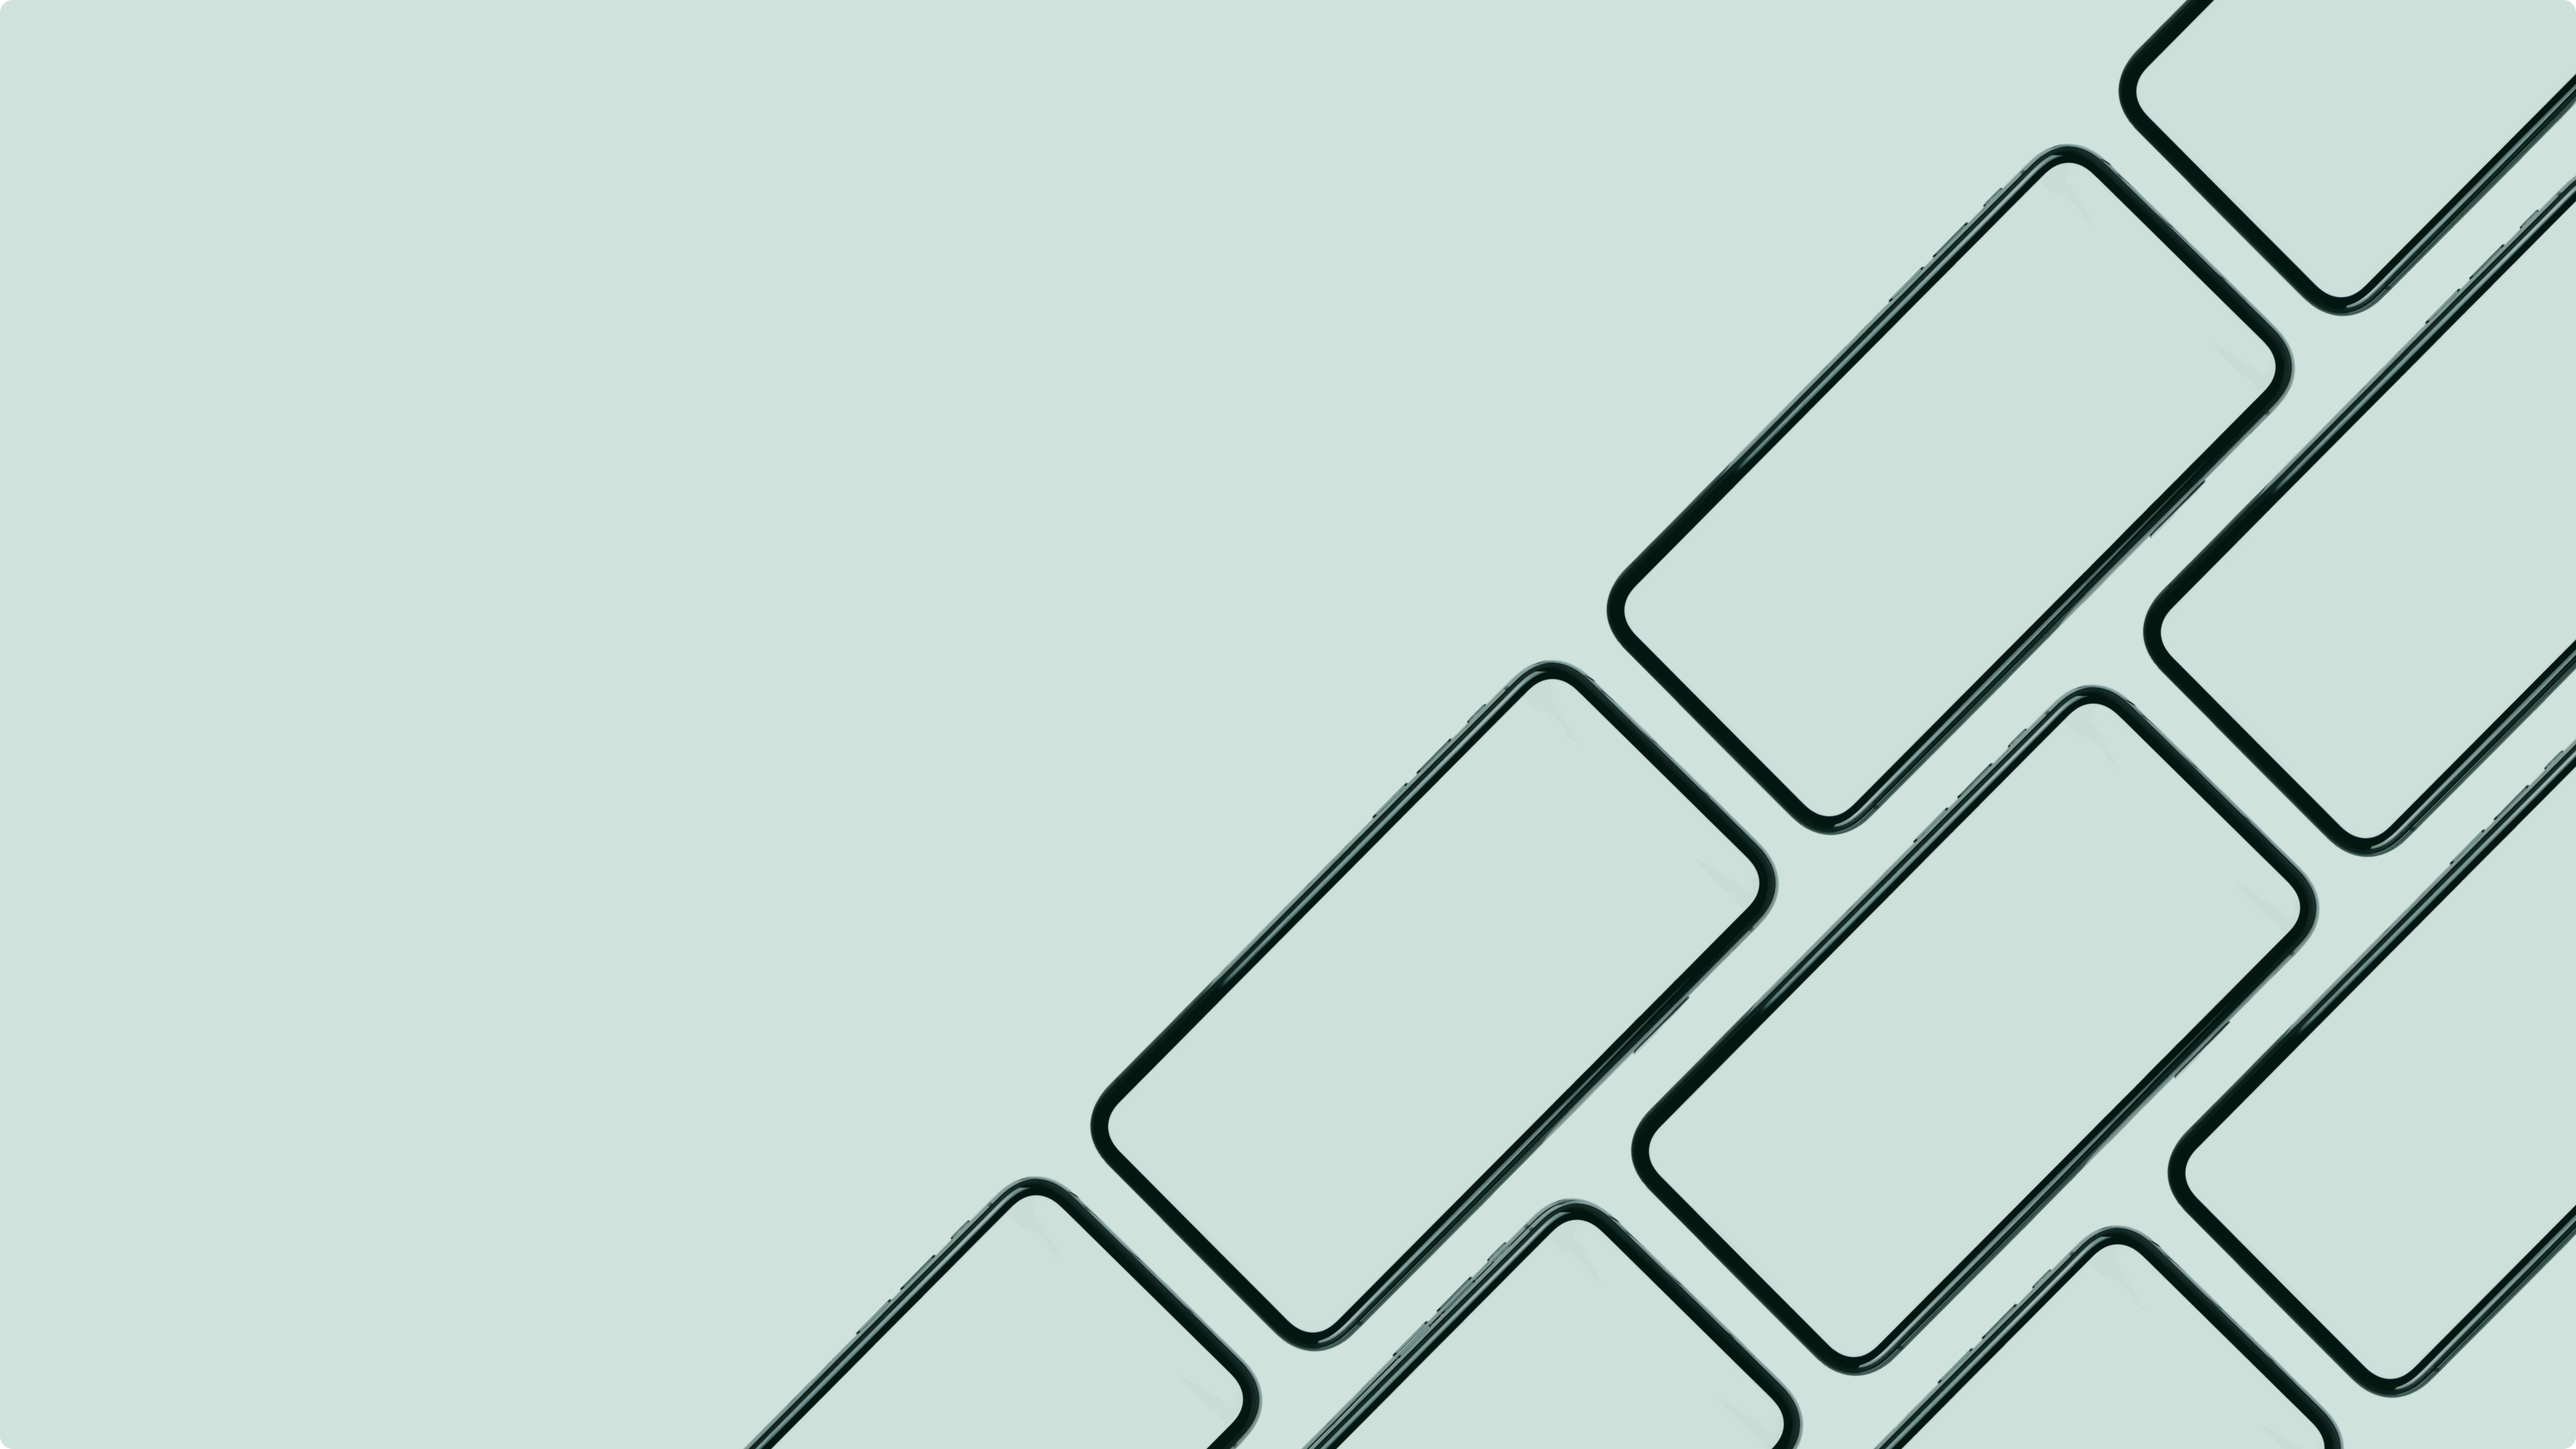

is to close more deals with fewer people. AI handles lead sourcing, qualification, and property matching. Brokers close deals. One broker can now close 100+ deals/year instead of 5.

Ghanatk Operating Stack

- Buyer/Seller Intent Signal Capture
- AI Voice Lead Qualification Agent
- AI Supply & Demand Data Aggregator
- AI Supply-to-Demand Matcher

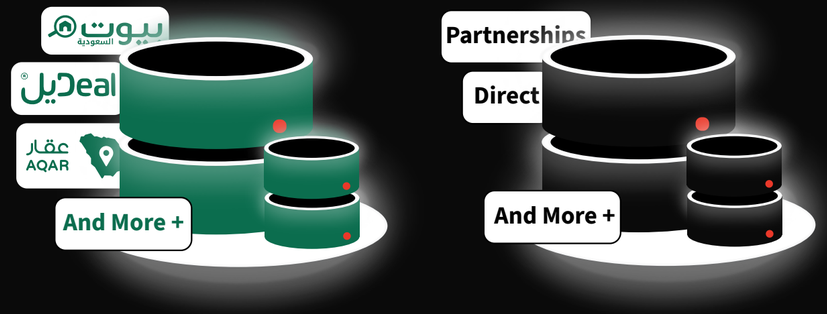

What this means

- More closed deals per broker
- Less time to close a deal
- Better margin per deal

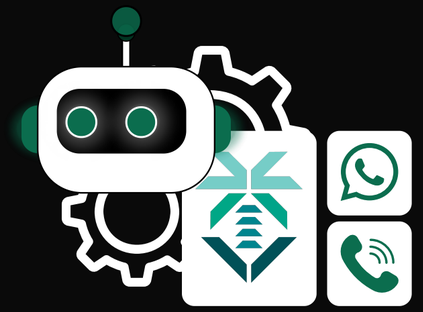

It is simple:

Supply Aggregation & Lead Capture

AI Qualification, Matching & Verification

Broker Handoff with Client Intelligence

The 100x broker
